BackTpack

The BackTpack carrying bag is designed to load on the spinal axis to improve and train good posture, body mechanics, balance, reduce pain, and provide ease and security while carrying everyday items. Features include a "sit strap" that allows the wearer to sit with the bag on while the load transfers off the shoulders and spine, a headphone port for ease in use of auditory equipment, a water bottle holder and multiple compartments on both sides. An optional hip loading accessory is available for those who should not have a spinal loading system.

BIGtrack

The BIGtrack Trackball has an oversized trackball with left and right mouse click buttons located behind the trackball to avoid unwanted mouse clicks. It also allows for second mouse connection, enabling both the BIGtrack and a second mouse to be connected for assisted or simultaneous participation. This trackball is also available in a switch-adapted version, which includes two standard 1/8-inch plugs for two switches. The left and right mouse clicks have been adapted for switch for activation (switches sold separately). The device can be used on IBM and compatible or Macintosh computers with USB or PS/2 connections.

Cruise

Cruise is a computer pointing device that requires no hand or wrist movement. Users control the speed and direction of the cursor with a single, soft touch of a control ring. The programmable unit stores personal settings for automatic retrieval each time the computer is powered up. Designed to be plug-and-play for any computer with PS/2 or USB connection, the device features two switch input jacks for single-switch access to left/right click buttons, a large cursor control ring for precise targeting, a large footprint for stable operation and wrist support, soft touch operation (no pressure required), and color-coded buttons (left/right click, drag-lock and double-click). It also offers four cursor speed control settings with memory and auditory feedback.

Pico

The Pico handheld video magnifier fits in a purse or pocket, and can be used to read even in dimly lit surroundings. Images are magnified 3 to 11 times and displayed in color, positive text (black on white), negative text (white on black), or yellow on blue modes. The unit uses a rechargeable battery.
